A Great English Statesman's secret. It is related that the secret of a celebrated English statesman's long life, was his system of eating. Every bite of food put into his mouth was chewed thirty times before he swallowed it. The consequence was that his stomach never bothered him, and he naturally enjoyed good health. Most men and women eat their food, and eat things which were never intended to be eaten. They become constipated, have a bad complexion, lose flesh, are brittle and nervous, and the first thing they know they are played out as the saying goes. It is gratifying to know that Hostetter's stomachic cures all stomach troubles. It is purely a vegetable medicine that has stood the test of many years. It cures cases which seem to be hopeless. Chronic sufferers from any disorder of stomach, liver, blood or bowels should try it.
